

Penetration Testing Results

Overview

In March and April 2026, GMO Cybersecurity by Ierae, Inc. conducted a penetration test targeting our company and the services we operate. We disclose the overview in this document.

Summary of Assessment Results

The penetration test identified multiple findings. We have prioritized the identified findings and address them.

We have prioritized the identified findings and address them. We address items with high urgency.

Scope and Perspective of Assessment

The assessment targets our company and the services we operate.

The penetration test aimed to obtain data entrusted to us by our customers, using known attack methods, vulnerabilities, and tools.
